cover-to-cover translation of
Fizika Goreniya i Vzryva

Volume 5, Number 1 · January–March, 1969

Contents

	Russian page	English page
Propellant Burning Mechanism in the Presence of a Pressure Drop. V. N. Marshakov and O. I. Leipunskii	3	1
Development of Combustion in an Isolated Pore. A. F. Belyaev, A. I. Korotkov, A. A. Sulimov, M. K. Sukoyan, and A. V. Obmenin	8	4
Penetration of Combustion into an Isolated Pore in an Explosive. A. D. Margolin and V. M. Margulis	15	10
Linear Pyrolysis of Polymethyl Methacrylate. E. V. Tkachenko, V. B. Ulybin, and A. S. Shteinberg	16	11
Measurement of the Total Heats in the High-Temperature Gasification of Polymers. B. M. Dmitriev, O. A. Kochetov, V. B. Ulybin, and A. S. Shteinberg	26	17
Two Regimes of Linear Pyrolysis of Condensed Substances. A. S. Shteinberg and V. B. Ulybin	31	20
Experimental Investigation of the Combustion Process in Heterogeneous Condensed Systems. G. G. Shelukhin, V. F. Buldakov, and V. P. Belov	42	27
Combustion Stability of Explosives. B. N. Kondrikov	51	34
Effect of Water, Ammonium Carbonate, and Certain Other Additives on the Combustion of Explosives. V. E. Annikov, B. N. Kondrikov, and N. A. Polyakova	60	41
Combustion of Fast-Burning Explosives. B. S. Svetlov and A. E. Fogel'zang	67	46
Some Characteristics of the Hydrodynamic Combustion Instability of Methyl Nitrate. E. I. Maksimov and A. A. Bairash	76	52
Flame Propagation with Allowance for Hydrodynamics and the Temperature Dependence of the Transport Coefficients. K. G. Shkadinskii and A. K. Filonenko	80	56

Contents (cont'd)

	Russian page	English page
Analysis of Equations for Determining the Normal Burning Velocity by the Constant-Volume-Bomb Method. V. S. Babkin and Yu. G. Kononenko	84	60
Machine Computation of the Kinetic Characteristics of Normal Flame Propagation. D. B. Akhmedov, V. A. Lobyshev, and V. V. Pomerantsev.	93	65
Promotion of Combustion. V. Ya. Basevich and S. M. Kogarko	99	69
Laws of Combustion of a Homogeneous Mixture in a Turbulent Flow. A. V. Talantov, V. M. Ermolaev, V. K. Zotin, and E. A. Petrov	106	73
Effect of Sound on a Turbulent Flame. V. E. Doroshenko and V. I. Furletov.	114	78
Vibratory Flame over a Coaxial Burner. V. N. Podymov and I. F. Chuchalin	125	85
Critical Autoignition Conditions for a System of Particles. E. N. Rumanov and B. I. Khaikin	129	88
Brief Communications		
Propellant Combustion in a Cylindrical Cavity. E. V. Konev	137	92
Autoignition Limits of Methanol and Formaldehyde Mixtures. V. A. Bunev, B. M. Melamed, R. S. Tyul'panov, and V. M. Khachaturyan	139	93
Discharge Waves in a Channel with a Sequence of Spark Gaps. Yu. I. Fadeenko, V. F. Lobanov, V. P. Chistyakov, and E. G. Vdovenko	144	97

Combustion, Explosion, and Shock Waves

Contents

Volume 5, Number 2 · April-June 1969

	Russian page	English page
Aerodynamic Theory of Gas Flames. L. A. Vulis	147	101
Some Problems in the Aerodynamics of Gas Flames. L. P. Yarin	155	107
Calculation of Flame Propagation Velocities. A. N. Ivanov	162	111
Stationary Problem of the Theory of Combustion. D. A. Vaganov and S. I. Khudyaev	167	114
Solution of the Problem of Gas Combustion in the Presence of Two Chemical Stages. M. O. Raznikova, L. S. Salakatova, and S. I. Khudyaev	173	117
Effectiveness of Inhibitors on the Combustion of Hydrocarbon Fuels. I. M. Abduragimov and G. Ya. Driker	178	120
Effect of Weightlessness on a Butyl Alcohol Diffusion Flame. I. M. Abduragimov	184	124
Flame Propagation in an Electric Field. G. D. Salamandra	189	129
Propagation of Combustion in Acetylene-Air Mixtures Through Narrow Slits and Openings. N. A. Boikov, A. G. Ikhno, and L. B. Reznik	194	133
Reinforcement of Shock Waves Interacting with a Cellular Flame. V. P. Karpov and A. S. Sokolik	200	136
Combustion Characteristics of Powdered Aluminum. A. F. Belyaev, B. S. Ermolaev, A. I. Korotkov, and Yu. V. Frolov	207	142
Combustion of Individual Boron Particles. M. A. Gurevich, I. M. Kir'yanov, and E. S. Ozerov.	217	150
Some Problems of a Laminar Boundary Layer on a Burning Surface. L. Yu. Artyukh, L. A. Vulis, and V. P. Kashkarov	222	154
Two-Dimensional and Axisymmetric Supersonic Fuel-Gas Flows. P. I. Chushkin	230	160
Numerical Method of Solving the Problem of Stationary Combustion in the Presence of Two Combustion Zones. E. A. Gel'man	236	164

Contents (cont'd)

	Russian page	English page
Existence and Stability of Steady-State Regimes in Tube Reactors with Internal Heat Exchange. L. M. Pis'men	239	166
Gasification of Carbon in the Presence of Sublimation and Self-Diffusion. E. S. Golovina and L. L. Kotova	249	172
Numerical Methods of Solving Problems with a Phase Transition. V. T. Gontkovskaya and K. V. Pribytkova	257	177
Difference Calculation of Ignition and Combustion Problems Including Hydrodynamics. K. G. Shkadinskii	264	181
Brief Communications		
Effect of Iron Oxide on the Combustion of Condensed Mixtures. V. S. Nikiforov and N. N. Bakhman	270	184
Effect of Pressure on the Burning Rate of a Mixture of Magnesium and Oxygen-Containing Organic Solids. V. V. Gorbunov, V. G. Khromov, and A. A. Shidlovskii	274	187
Combustion of the Composition Fe_2O_3 + Al + Al_2O_3. L. D. Romodanova and P. F. Pokhil	277	189
Detonation Luminescence Spectrum of Nitromethane. V. S. Trofimov and A. V. Troyan	280	191
Effect of an Explosion on Matter. Formation of Solid Solutions of Rubidium and Cesium Chlorides. S. S. Batsanov, G. S. Doronin, E. M. Moroz, I. A. Ovsyannikova, and O. I. Ryabinina	283	193
Study of the Action of Catalysts Using Layered Systems. B. S. Ermolaev, A. I. Korotkov, and Yu. V. Frolov.	286	195

COMBUSTION, EXPLOSION, AND SHOCK WAVES

A translation of *Fizika Goreniya i Vzryva*

Volume 5, Number 3 July-September, 1969

CONTENTS

	Eng./Russ.
Structure of the Detonation Front in Condensed Explosives—A. N. Dremin, O. K. Rozanov, S. D. Savrov, and V. S. Trofimov	199 291
Nature of the Critical Detonation Diameter of Condensed Explosives—A. N. Dremin and V. S. Trofimov	208 304
Smoothness of the Detonation Front in a Liquid Explosive—Ya. B. Zel'dovich, S. B. Kormer, G. V. Krishkevich, and K. B. Yuskho	213 312
Transition from Combustion to Detonation in Porous Explosives—A. I. Korotkov, A. A. Sulimov, A. V. Obmenin, V. F. Dubovitskii, and A. I. Kurkin	216 315
Low-Velocity Detonation of Cast Explosives—I. V. Babaitsev, B. N. Kondrikov, Z. V. Paukova, and V. F. Tyshevich	223 326
Propagation of Explosion in Thin Layers of Solid Explosives—V. K. Bobolev, A. V. Dubovik, I. A. Karpukhin, and V. V. Rybakov	229 331
Detonation of Porous Explosives—V. A. Veretennikov, A. N. Dremin, and K. K. Shvedov	234 338
Low-Velocity Detonation of Powdered Explosives—A. K. Parfenov and I. M. Voskoboinikov	240 347
Initiation and Development of Detonation as a Result of the Action of Weak Shock Waves on Liquid Explosives—A. V. Dubovik and V. K. Bobolev	245 354
Detonation and Shock Adiabats of the Products of RDX—N. M. Kuznetsov and K. K. Shvedov	250 362
Conductivity Transition Zone and Polarization of TNT Behind the Shock Front—A. G. Ivanov, Yu. N. Tyunyaev, V. N. Mineev, Yu. V. Lisitsyn, and E. Z. Novitskii	256 369
Shock Initiation of Combustion in Initially Unmixed Heterogeneous Systems—S. M. Kogarko, A. V. Lyubimov, and V. P. Kozenko	263 379
Structure of the Detonation Front in Gases (Survey)—B. V. Voitsekhovskii, V. V. Mitrofanov, and M. E. Topchiyan	267 385
Theory of Detonation in Rough Tubes—S. S. Rybanin	274 395
Combustion of a Stationary Particle of Low-Boiling Metal—L. A. Klyachko	279 404
Problems of Low-Temperature Combustion—S. A. Yantovskii	285 413
Jet Flame Stabilization and Some Problems of the Intensified Combustion of Mixtures in a Flow—V. A. Kosterin, L. A. Dudin, I. P. Motylinskii, E. V. Rzhevskii, B. A. Rogozhin, and A. Ya. Khismatullin	291 422
BRIEF COMMUNICATIONS	
Combustion Temperature of Metal-Powder Aerosols—B. M. Zlobinskii, V. G. Ioffe, Kh. I. Peirik, and E. I. Popov	298 432
Mechanism of the Action of Inhibitors of the Combustion of Ammonium Nitrate Mixtures—A. P. Glazkova and O. K. Andreev	299 434
Leading Stage in the Combustion of Powders—P. F. Pokhil	303 439

CONTENTS

(continued)

	Engl.	Russ.
Statistical Method of Obtaining the Combustion Characteristics of Metal Particles —M. A. Gurevich, G. V. Ignatov, E. S. Ozerov, and B. I. Sotnichenko	304	441
Preservation and Study of Fluorite Single Crystals under Conditions of Dynamic Compression—S. S. Batsanov, E. M. Malyshev, L. I. Kobets, and V. P. Ivanov	306	444

COMBUSTION, EXPLOSION, AND SHOCK WAVES

A translation of *Fizika Goreniya i Vzryva*

Volume 5, Number 4 October-December, 1969

CONTENTS

	Eng./Russ.
Triple Configuration of Detonation Waves in Gases—L. G. Gvozdeva and O. A. Predvoditeleva	309 451
Propagation of Predetonation Regimes in Porous Explosives—A. V. Obmenin, A. I. Korotkov, A. A. Sulimov, and V. F. Dubovitskii	317 461
Determination of the Critical Shock Initiation Conditions for Homogeneous Explosives —I. M. Voskoboinikov, V. M. Bogomolov, and A. Ya. Apin	323 471
Mechanism of Initiation of Condensed Explosives by Laser Radiation—A. A. Brish, I. A. Galeev, B. N. Zaitsev, E. A. Sbitnev, and L. V. Tatarintsev	326 475
Impact Sensitivity of Solid Explosives with Allowance for Transmission of Explosion —I. S. Klochkov and L. S. Il'inskaya	329 480
Initiation of Explosion in Solid Explosive under Conditions of Deformation in a Closed Space—G. T. Afanas'ev, V. K. Bobolev, and V. I. Dolgov	333 486
Sensitivity of Ammonium Perchlorate to Mechanical Stresses—G. T. Afanas'ev, V. K. Bobolev, and Yu. A. Kazarova	336 491
Initiation and Efficiency of Explosions at High Hydrostatic Pressures—E. A. Levin, S. A. Lovlya, and Yu. P. Nelasov	339 495
Shock Compressibility of NB Powder in the Porous and Nonporous States —V. A. Veretennikov, A. N. Dremin, and K. K. Shvedov	342 499
Geometry of the Accelerating Predetonation Wave Front—V. A. Vasil'ev and L. G. Bolkhovitinov	346 506
Method of Studying Phase Transformations at High Pressures using the Shock Compression of Porous Substances—A. I. Funtikov	350 510
Phase Transformations in Shock-Compressed Rock Salt—M. I. Brazhnik, L. V. Al'tshuler, and L. A. Tarasova	352 513
Electrical Effects Associated with Shock Loading—A. G. Ivanov, V. N. Mineev, E. Z. Novitskii, Yu. N. Tyunyaev, and Yu. V. Lisitsyn	356 517
Conductivity of Acrylamide and Polyacrylamide behind a Shock Front—V. N. Zubarev, T. N. Ignatovich, A. N. Shuikin, and P. A. Yampol'skii	361 524
Shock-Compression Polymerization of Hard-to-Polymerize Organic Compounds —L. V. Barabe, A. N. Dremin, S. V. Pershin, and V. V. Yakovlev	364 528
Interpolation Formula for the Burning Rate of Certain Composite Systems —B. V. Novozhilov	370 539
Combustion of Ammonium Perchlorate in Layered Systems—Yu. V. Frolov, A. A. Zenin, and V. P. Yakovlev	373 544
Combustion of a Gas Mixture in a Fluidized Bed of Fine-Grained Material —A. P. Baskakov and I. V. Kirnos	377 549
Stability of Turbulent Combustion in Chambers—S. K. Aslanov	381 554
Calculation of the Length of Gas Diffusion Flames—L. P. Yarin	384 559
Pyrolysis of Organic Compounds in a Laminar Diffusion Flame—A. D. Kokurin and L. G. Rodygina	388 563

CONTENTS

(continued)

	Engl.	Russ.
Total Combustion Kinetics of Hydrocarbon Fuels—V. L. Zimont and Yu. M. Trushin	391	567
Relation between the Flameless Burning Rate of Condensed Mixtures and Oxidizer Particle Size—S. S. Novikov, P. F. Pokhil, and O. P. Rysakova-Romashkan	395	574
BRIEF COMMUNICATIONS		
Experimental Determination of the Coefficient of Light Absorption and Conductivity of Shock-Compressed Ionic Crystals—G. A. Kirillov, M. V. Sinitsyn, F. V. Grigor'ev, S. B. Kormer, V. A. Samylin, and O. N. Kuznetsov	398	578
Thermal Decomposition of a Model Mixture Based on Ammonium Perchlorate —V. V. Aleksandrov, V. M. Gladkikh, and S. S. Khlevnoi	400	581
Polymerization of Acrylamide as a Function of the Shock Compression Amplitude Effect of Reflected Shocks—A. V. Barabe, A. N. Dremin, and A. N. Mikhailov	401	583
Effect of Carbon Black and Fe_2O_3 on the Rich Combustion Limit of Condensed Mixtures —V. V. Evdokimov and N. N. Bakhman	403	585
Initiation of Detonation in Low-Density TNT by an Air Shock—L. G. Bolkhovitinov and V. A. Vasil'ev	404	587
Effect of Initial Temperature of Certain Liquid Explosives on Their Sensitivity to the Initiation of Explosion by Cavitation—V. E. Gordeev and Yu. S. Matveev	406	589
Explosivity of Monosilane-Air Mixtures—A. N. Baratov, L. P. Vogman, and L. D. Petrova	407	592
